Assignment–2 Instructions

Total Marks: 15

Assignment–2 consists of **two group assignments**:

1. Programming Assignment – 10 Marks

- This is a **group assignment**.
- Each group must work collaboratively on the assigned programming problem/task.
- The completed assignment must be submitted in **Jupyter Notebook (.ipynb) format / zip folder**.
- The notebook should contain:
    - Problem statement / objective
    - Approach or methodology followed
    - Source code
    - Output/results
    - Brief explanation of the implementation and results
- Ensure that the notebook is **complete, executable, and properly organized**.
- Include the **details of all group members** in the notebook.

Submission Format

File format: .ipynb / source code in zip folder

Suggested file naming convention:

Assignment2_Programming_Group_<GroupNo>.ipynb

2. Situated Learning Assignment – 5 Marks

- This is also a **group assignment**.
- The group must select a relevant **domain/context** and apply the concepts learned in the course to a real-world organizational scenario.
- The assignment must be submitted as a **PDF document**.

The PDF must clearly mention:

1. **Team Details**
    - Group number
    - Name of each team member
    - BITS ID of each member
    - Any other required student details
2. **Industry / Domain**
    - Clearly specify the domain chosen for the situated learning activity.
    - Examples: Healthcare, Banking, Education, Automotive, Retail, E-commerce, Manufacturing, etc.
3. **Organization Type**
    - Clearly mention the type of organization considered for the activity.
    - Examples: Software Product Company, IT Services Company, Startup, Government Organization, Hospital, Bank, Manufacturing Organization, etc.

Submission Format

File format: .pdf

Suggested file naming convention:

Assignment2_SituatedLearning_Group_<GroupNo>.pdf

Important Instructions

- **Both components are group assignments.**
- Ensure that **all group members contribute** to the assignments.
- The same group composition should be maintained for both components, unless otherwise instructed.
- Clearly mention **all team member details** in the submissions.
- Submit the assignments in the **specified file formats only**.
- **One submission per group** is required for each component.
- Late submissions or submissions in an incorrect format will be handled according to the course guidelines.

Students are advised to review the requirements carefully before submitting Assignment–2.
